Summary

Passionate developer that is interested in driving innovation and creative solutions as well as working with others to achieve these goals.

Experience

Frontend Engineer

Sparklight Solutions

May 2022 - Present (1 year)

- Build user interfaces using React and Tailwind CSS, utilizing reusable components and following design guidelines
- Fetch data from APIs using Axios or Fetch, handling errors and optimizing performance
- Display data retrieved from APIs in an organized and visually appealing way, using Bootstrap or custom CSS
- Collaborate with backend engineers to design API endpoints and data structures that align with frontend requirements.
- Write unit tests and integration tests for components and features, ensuring functionality and accessibility
- Optimize page load speed and overall performance using techniques like lazy loading, code splitting, and caching.
- Implement responsive design to ensure web applications are accessible on multiple devices and screen sizes
- Troubleshoot issues and bugs, working with cross-functional teams to identify and fix problems
- Stay up-to-date with industry trends and new technologies, experimenting with new tools and techniques to improve productivity and user experience.

Freelance Software Engineer

Upwork

Jul 2021 - Present (1 year 10 months)

- Built a restaurant menu app that increases the revenue of the restaurant by 20%
- Built an e-commerce app for a local gadget business that increases the number of customers by 30%.
